

BioStar

Compostable Can Liners

“BioStar liners are completely compostable and meet ASTM D6400 specifications for compostable plastics”

Even if the contents of your trash bag are completely biodegradable, the entire package may not be. By using compostable bags you can do even more to protect the environment.

Not only are BioStar liners completely biodegradable, they also meet the ASTM D6400 standards for compostable plastics for use in commercial facilities.

The use of BioStar can liners helps reduce landfill waste, and reduces pollution and conserves water and other resources used in the management of waste sites.

Take action and help reduce the more than 200 million tons of landfill waste that is produced every year by incorporating BioStar compostable products into your program.

- **100% biodegradable and compostable.**
- **Meets ASTM D6400 Standard Specification for compostable plastics.**
- **Available in four of the most commonly requested sizes.**
- **Green tint printed with the BPI compostable logo.**
- **Available on coreless rolls.**

Tested and certified by the Biodegradable Products Institute in conjunction with the U.S. Composting Council. Only tested and approved products are authorized to use the BPI Compostable label.

Stock Number	Gallon Capacity	Size	Strength	Color	Case Pack	Cases per Pallet	Cases per Layer
BS30G	20-30	30 x 36	Extra Heavy	Green	150 (10/15)	126	9
