

# Performance HD

## High Density Coreless Rolls

Performance HD is the newest product in the Pitt Plastics family. These liners are based on High Density resins, the most cost efficient film available in the market today. They perform on a level equivalent to traditional gauges and microns. Performance HD liners are available on convenient coreless rolls which simplifies inventory control and provides easy portability.

Performance HD liners feature innovative vacuum packaging. This makes them more freight efficient and generally reduces case cube requirements. The clear plastic packaging reduces the possibility of case damage due to crushing, dust and water, and makes the product more attractive to food service users. It also makes the product color easy to identify.

- Performs at traditional gauges/microns
- Reduces case cube vs. traditional packaging
- Innovative packaging
- Consolidated number of SKUs; eliminates duplication
- Confines odors
- Reduces the possibility of damage due to crushing
- *Not suitable for sharp or jagged objects*
